Rhode Island

Massachusetts

District of Columbia

U.S. Supreme Court

U.S. Court of Appeals for  
the First Circuit

## OVERVIEW

Alan's practice encompasses all aspects of energy, [environmental](#), and public utility law. His clients include some of the largest national and regional energy, renewable energy, cable, telecommunications and water and transportation companies. Alan has advised these clients through all stages of project development, financing, mergers and acquisitions, and in regulatory proceedings and litigation, and government affairs.

With proven experience representing clients in wind, solar, hydro and other renewable energy matters, Alan has represented developers, investors, contractors, utilities, state agencies and municipalities in several successful and innovative sustainable energy projects. In the communications sector, Alan's clients include national cable companies and regional telecommunications and internet provider businesses. In the water sector, his clients include municipal and regional water utilities. In the transportation sector, Alan's clients include ferry businesses and motor vehicle companies, as well as transportation network providers.

Prior to joining Adler Pollock & Sheehan, Alan served in several capacities in industry and government. He served as an Assistant General Counsel and Director of Regulatory Affairs for utility companies, as General Counsel for the Rhode Island Department of Environmental Management, and as a Special Assistant Attorney General.

## REPRESENTATIVE MATTERS

- Represents solar energy project developers in successful multi-phased development, permitting and financing transactions for the first utility scale landfill solar project in the region (8 megawatts).
- Represents national and regional cable, telecom and broadband internet service providers transitioning to internet applications for communications services.
- Represented state economic development agency in permitting for the first offshore wind development in the U.S., located near Block Island, R.I.
- Negotiated all significant commercial and financing agreements necessary for the development and financing of several (2 megawatts) land based wind turbine projects

in Massachusetts and Rhode Island.

- Developed landmark renewable energy power purchase agreement, turbine supply agreement, wind energy lease agreement, EPC agreement, Renewable Energy Credit Agreement and other key documents required for use by an innovative public/private partnership wind energy project located on a municipal landfill in Massachusetts.
- Represents natural gas power developers and entities in permitting and transactional matters associated with a \$350 million dollar sale of a 550 megawatt combined cycle natural gas power plant and a \$315 million dollar sale of a 279 megawatt combined cycle natural gas power plant in New England.
- Obtained all energy siting and permitting approvals for the construction of transmission facilities necessary to develop the second largest (40 megawatt) landfill/methane energy generation facility in the U.S.
- Secured approvals for rate adjustments and financing for a regional water utility and funding for replacement of a water-treatment facility and improvements to infrastructure.
- Negotiated an innovative lease of a publicly owned hydropower production facility on a river in Rhode Island for use by a private hydropower developer and represented seller in transactions involving the sale of equity interests in a hydropower business.
- Successfully resolved several multi-million dollar commercial financing disputes on behalf of regional telecommunications and internet service providers.
- Created the rules and administrative program requirements for a state renewable energy financing corporation to help facilitate the development of new clean energy projects.
- Advised ferry and motor carrier businesses expanding into new market opportunities in New England.
