

TTA™

THE AP&S PROSECUTION FOCUS

Patent + trademark prosecution engineered for efficient progress at the USPTO.

Move intellectual property forward — with purpose.

Every month an application sits at the USPTO is a month the asset isn't working. TTA is how AP&S shortens that stretch, deliberately, without trading away scope or strategy.

Spend with purpose

Fewer avoidable cycles reduce friction and keep prosecution spend more predictable.

Secure rights sooner

Reaching USPTO milestones earlier puts patent and trademark rights in position sooner.

Commercialize earlier

Rights in hand support licensing, financing, product launches and brand expansion.

How AP&S drives TTA

- Front-load strategy so the filing reflects both the legal requirements and the business objective.
- Use examiner-ready advocacy — including interviews and targeted responses — where it moves the matter.
- Decide quickly, with clear options, budgets and next-step recommendations.
- Keep the end asset in view: claim scope, brand protection, enforceability and portfolio value.

What we handle

PATENTS

- Preparation and prosecution built around durable, business-aligned rights.
- Strategic responses, examiner engagement and portfolio decisions designed to keep matters moving.

TRADEMARKS

- Clearance, filing and refusal-response strategy aligned with brand expansion and actual use.
- Prosecution managed toward the right USPTO milestone — allowance or registration, depending on filing basis.

SECTORS WE SERVE

Medical devices · Advanced materials · Software and AI · Cleantech · Consumer products
